

**BIEWER LUMBER™**

**FRTW**

**FIRE RETARDANT SPECIALISTS**

For more than 30 years, builders and homeowners have trusted Biewer Lumber Fire Retardant Specialists to provide the highest quality fire retardant treated wood. Our pressure-treated FRTW is a science-backed solution for slowing the spread of flames and reducing smoke in the occurrence of a fire. FRTW can be used in residential and/or commercial applications, and it is specifically designed to meet codes that increase safety in both public and private buildings. Trust our family to protect yours—trust Biewer FRTW.

- Listed in American Wood Protection Association Standard (AWPA) P-49-15
- Complies with the International Building code
- Fire Retardant chemical contains no formaldehyde, halogens, sulfates or ammonium phosphates
- Meets Class A requirements for flame spread and greatly reduces smoke development
- Fire Retardant chemical classified as a UL Recognized Component
- Biewer FRTW is not considered a hazardous material
- No more corrosive to fasteners/connectors than untreated wood
- 3rd Party Quality Control Process
- Biewer's FRTW has been tested in accordance with ASTM E-119
